WASHINGTON, D. C., April 30, 1870. Dear Journal:-The Committee on Education and Labor are daily investigating the charges against General O. O. Howard, Commissioner of the Freedmen's Bureau. The examination of witnesses has disclosed enough to show that a very large quantity of Congressional white-wash will be required to make General Howard appear as spotless and immaculate as a Radical

The Committee on Banking and Currency yesterday voted to report to the House providing for the issue of ninety five millions of dollars of additional bank notes, and also for the redemption of forty millions of three per cent. certificates, which are now held by the banks as lawful reserve. Fifty millions of legal-tenders are to be withdrawn and their place to be supplied by the remaining fifty millions of bank notes. Whether these portions of the bill will satisfy the amjority of the House, who ordered the Committee to report a bill increasing the currency fifty millions, is very questionable .-Some contend that this is a virtual contraction of currency. The bill also provides for a bond bearing 41 per cent interest, which the new banks are required to pay in gold or its equiva-
